

Kenja

Kenja – 8yr old neutered female beagle.

Kenja is looking for a pet home to retire to.

She was bred by MAFBNZ Detector Dog Programme and was placed into our Puppy Walking Programme. She has worked for MAFBNZ for the past 7 yrs with many successes.

Kenja does have a couple of health conditions that require long term treatment and involve daily medication and routine blood and urine testing.

Kenja would love a home where she will get a daily walk, a soft bed inside to sleep on and a family that will fuss over her. Kenja is great with children but would prefer a home with older children and she gets on well with other dogs.

Kenja's new family needs to be fully aware of what beagles are like and committed to providing Kenja with the health care that she requires. The potential family will have an interview and property inspection, then a 2 week trial period with Kenja prior to permanent placement. Kenja is free of charge to the right home.
